

**Automat**

Innovation that inspires

## ABOUT US

AUTOMAT's journey began with a simple yet profound vision: to uprising the beverage Industry through automation.

We are in to innovation and development of finest Tea and Coffee vending machines right here in India. Our founders, inspired by the rich tapestry of Indian culture, were determined to infuse these elements into our machines while catering to the global demand for top-quality beverages.

Welcome to automat, where innovation, craftsmanship, and passion for exceptional Tea and Coffee experiences come together to create Innovative beverage machines like no other. We are a proud Indian company, devoted to revolutionizing the way the world enjoys its favorite brews.

Our passion for precision engineering and unmatched quality drove us to establish state-of- the-art manufacturing facilities, where every automat Machine is meticulously crafted to perfection. We take immense pride in offering a taste of India's heritage to the world through our innovative products.

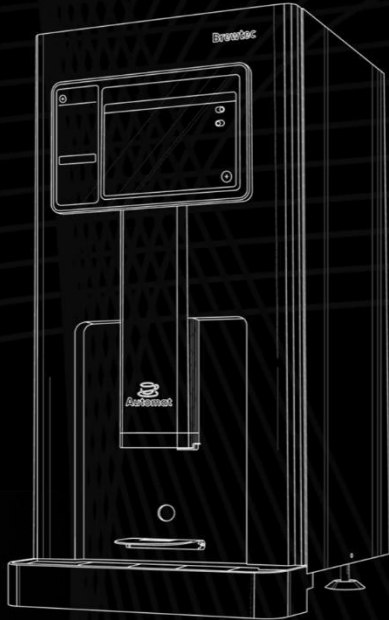

**An Intelligent Machine for freshly brewed Tea & Filter coffee**  
(with fresh milk)

Tea boiling with patented tea boiling technology to extract the best flavors and aromas

# Elevating Experiences with a Premium Touch”

Blend of Authentic brewing process with Global appeal

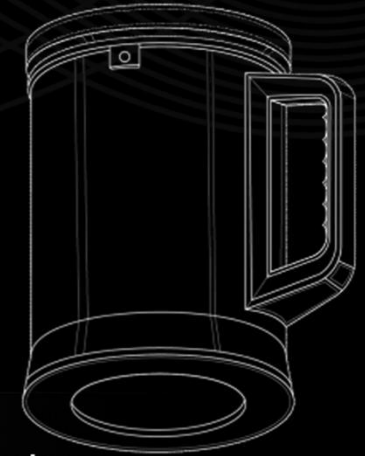

## Smart Technology that to Empowers

"India's 1st Smart Vending machine which is AI enabled, more intuitive and Integrates advanced automation"

## Patented flush heating

while dispensing for Piping hot each cup

## Patented Boiling Technology

Our patented boiling technology, brew the tea in authentic way with smart interim boiling's system which extracts best aroma and flavour and give you essence of home made tea.

# Technical Features

“comprehensive technical features include advance automation, multi-functional capabilities, and seamless connectivity.”

1st Time in India

## Consistent Taste Always !

Reliable and uniform dispensing is assured with each brew cycle, ensuring consistency in every serving.

## 8 Choices

### Choice of Beverages

Choose from 8 beverages and enjoy traditional aromas and flavours instantly.

## 10-30 Cups Per Brew

### Flexible Brewing Capacity

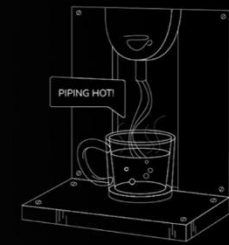

The brewing system can brew 500 to 600 cups per day according to demand.

## 80°C+ Each Cup

### Desired Beverage Temperature

Our technology guarantees piping hot drinks at desired temperature upon every dispensing.

## 5 Star

### IOT Enabled Technology

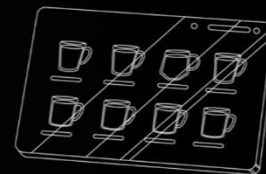

Sends alerts for drink availability and maintenance, tracks cup/consumable usage, operates through Wi-Fi/SIM.

## 10 Inch TFT

### Easy Going Operation

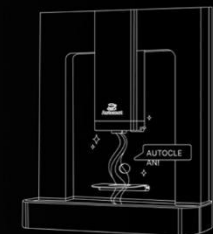

It automatically eliminates residue from prior dispensing, guaranteeing the upcoming drink retains its flavor.

## 100% Hygiene

### Auto Cleaning Processor

It automatically eliminates residue from prior dispensing, guaranteeing the upcoming drink retains its flavor.

# Brewtec world in class innovation by Automat

# Smart Technology

AI - powered technology capable of tracking the usage of beverages, consumable items, and spare parts.

Maintain Service Records , parts Consumption and send service-due notifications

Auto Cleaning

Notify Operator for Beverage Availability Status

Records Consumption and Consumables records

# Product Specification

Daily output range 500 cup

## Beverage

8 Beverage Choices

Classic Chai/Kadak Chai/Black Tea/Hot Milk/Filter Coffee/Strong Filter Coffee/Black Coffee/Hot Water

## Technical Details

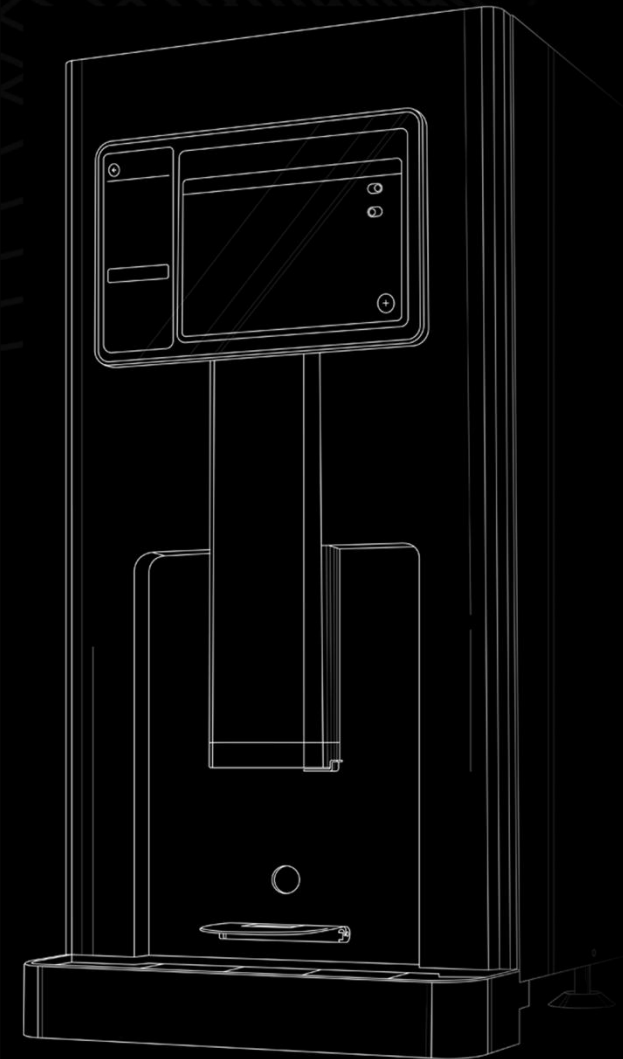

Recommended Daily Output	500 Cups
Tea Brewer Capacity	2Ltr
Tea Storage Capacity	2.5Ltr
Coffee Storage Capacity	1.5Ltr
Water Boiler Capacity	4Ltr
Power Connection	220-240V
Power Rating	3000W
Water Supply	Barelled Water, RO Water with control flow
Water Supply	Fixed Water + Barrelled Water + Tank Water

## Body

Newt Weight	43kg
Dimensions	(D*W*H)559*331*737mm
Material	Stainless Steel

## Screen

Screen	10" inch Colourful Screen
The screen resolution	1440 x 1024

## More products we have

**AU 50** High through put Automatic  
Bean to cup Coffee Machine

**AU 12** Super Flagship Beans  
to Cup Commercial Fully Automatic  
Coffee Machine

**AU-HC 5** Hot & Cold  
Beverage Machine

**AU-DCB 7** Double Chamber  
Milk Boiler with Custom  
Temperature Settings

India's 1st Induction technology based  
Tea coffee boiling processor.
