Product Highlights

Responsible for precisely controlling the brewing process to extract the best flavors and aromas

Sleek and Elegant Design

Adds a touch of sophistication in any setup and offers a seamless and convenient user experience!

Dual Chamber Milk Container

A dual chamber milk boiler is a specialised design used for heating the milk in two separate compartments simultaneously. This unique design allows for efficient heating of milk in two batches simultaneously. This reduces processing time and increases overall efficiency.

Milk Heating With In-Direct Heating Method

This indirect heating method is particularly beneficial for heating milk as it ensures efficient heat transfer while minimizing the risk of any undesirable effects on the milk's flavor and nutritional content and significantly increased energy efficiency!

Technical Features

Made of 304 Grade of Stainless Steel

Sophisticated and polished milk boiler featuring a sleek and elegant design, ideal for your dispensing machine.

Heat Resistance Insulated Walls

Insulated walls with high heat resistance ensuring optimal functionality in the milk boiler.

Transparent Lids for Volume Visualisation

See-through lids enabling easy volume visualisation in the milk boiler machine for convenient monitoring.

Dual Temperature Controllers

Dual temperature controllers offer precise heat regulation in the milk boiler, ensuring optimal temperature management.

Effortless Maintenance or Cleaning

Simplified cleaning procedures for minimal upkeep, ensuring a hassle-free experience with low maintenance.

Dual Chamber Milk Container

A dual-chamber milk container, each chamber spanning 3.5 Ltrs equipped with temperature control with total 7Ltrs.

Product Specification

7 Ltrs Capacity

Technical Details	
Model Number	AT-DB07
Voltage	220-240V
Frequency	50/60Hz
Power	800W+800W
Capacity	3.5L+3.5L
Temperature Range	30-95°C
Carton Weight	9.3kg
Carton Size	290X605X375mm
Body	
Product Weight	7.8kg
Product Size	225X549X398mm
Material	Stainless Steel
